ESTIC

Smaller, More Powerful

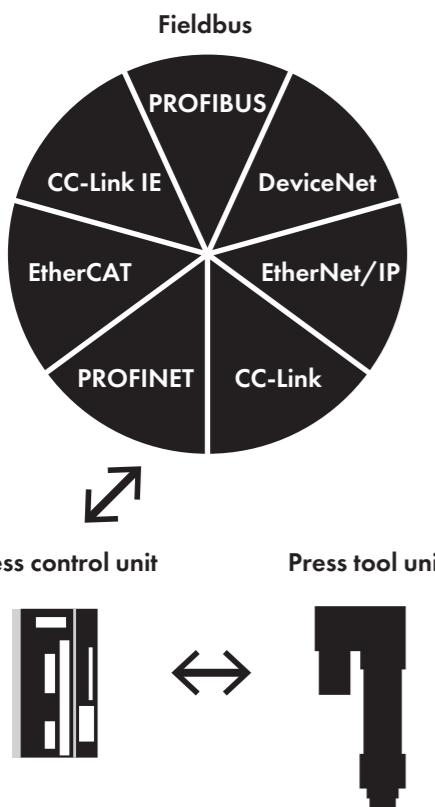

Servo Press Controller

MPU60

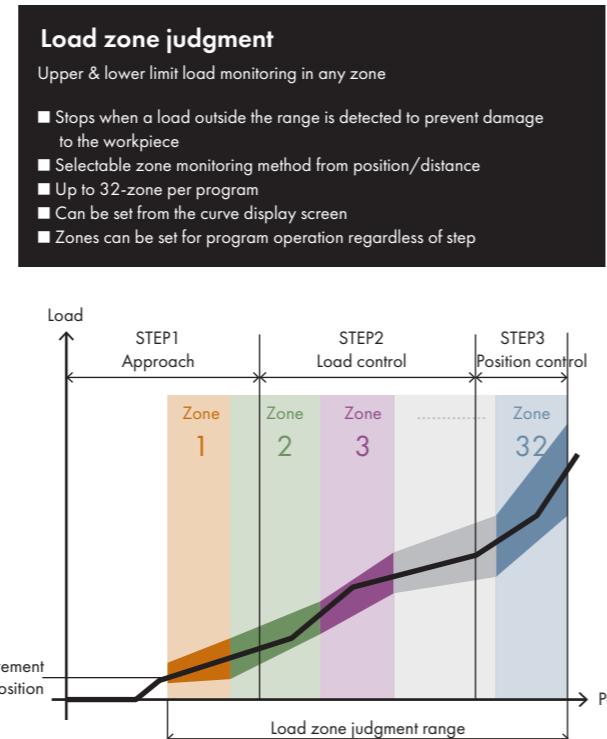

01

Change pressing parameters through Fieldbus

02

The 32-zone judgment function ensures error proof operation

03

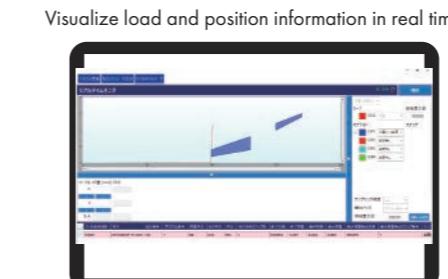

Improved operability with intuitive user interface

(Available in English, Japanese & Chinese)

Step function

Real time monitor

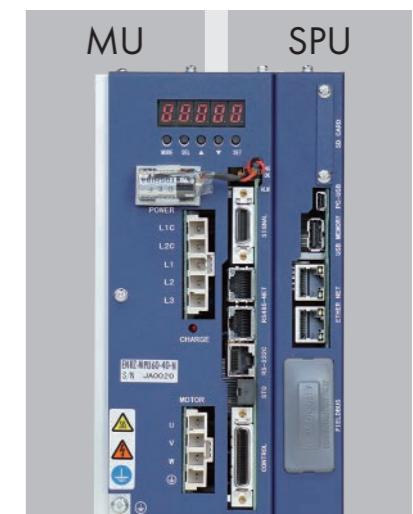

04

New MU & SPU integration reduces size by 50%

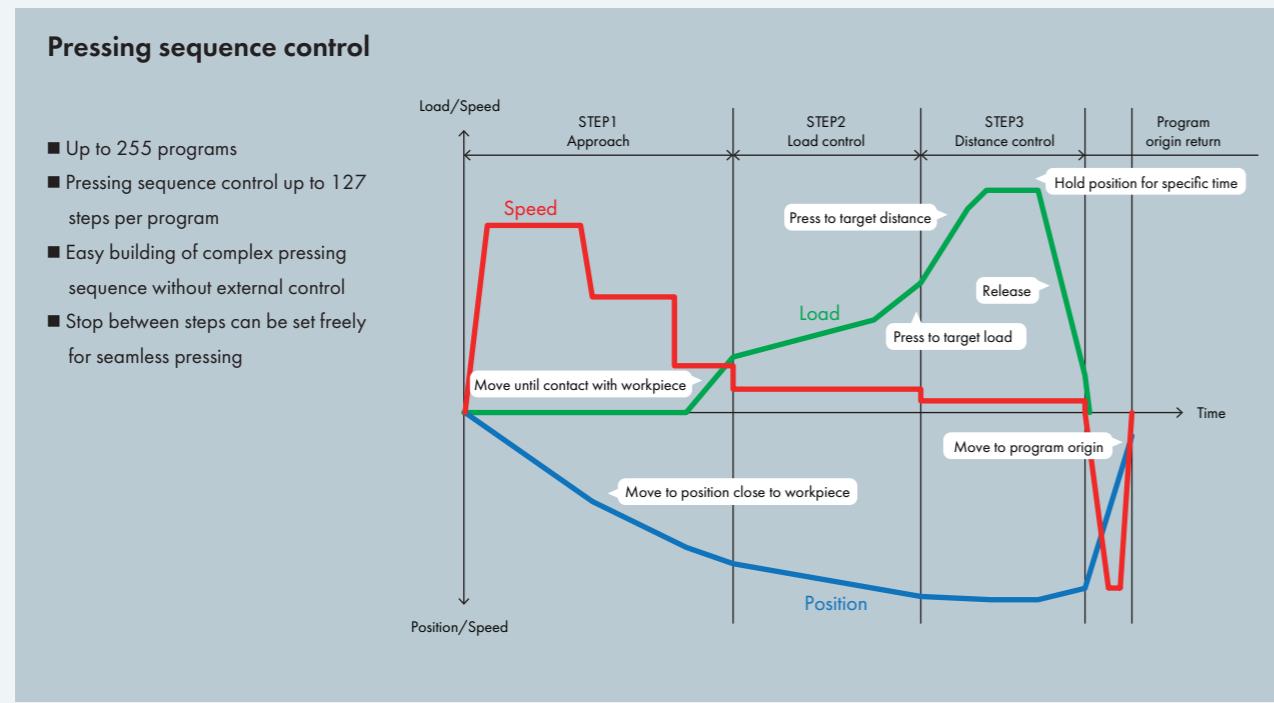

※ ESTIC comparison based on press control unit volume

MPU60 Servo Press Controller

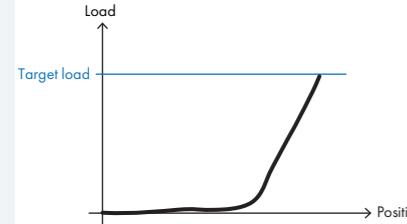

Improve quality with various pressing control and judgment functions

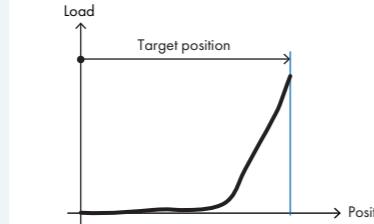

Pressing control

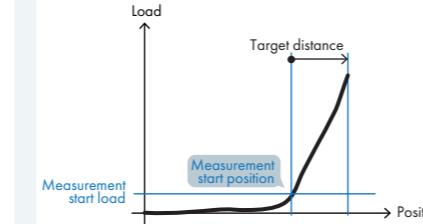

1 Load control

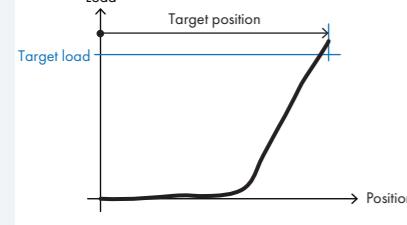

2 Position control

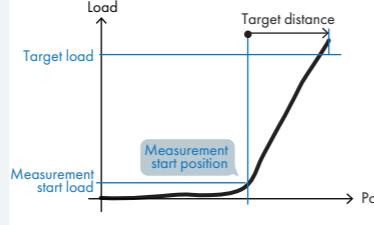

3 Distance control

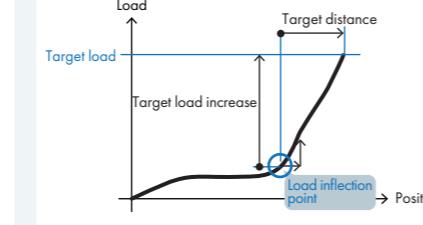

4 Load & position control

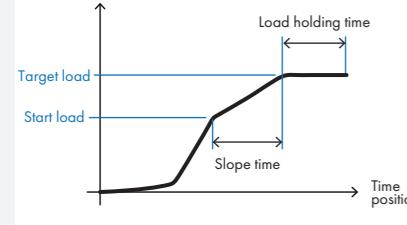

5 Load & distance control

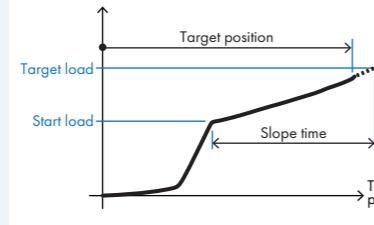

6 Inflection point stop control

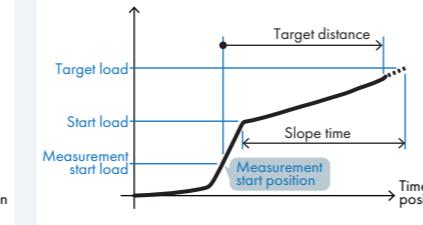

7 Constant load time control

8 Constant load position control

9 Constant load distance control

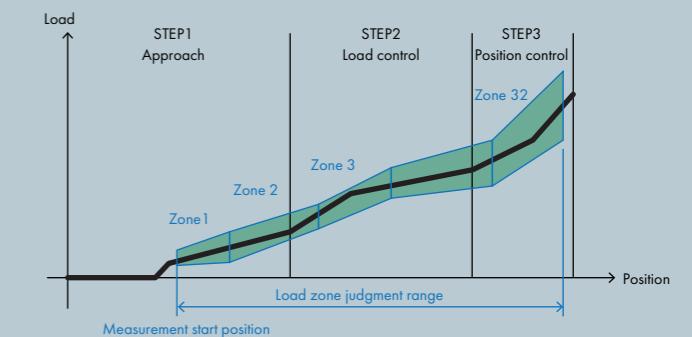

Judgment function

Compatible with all pressing controls

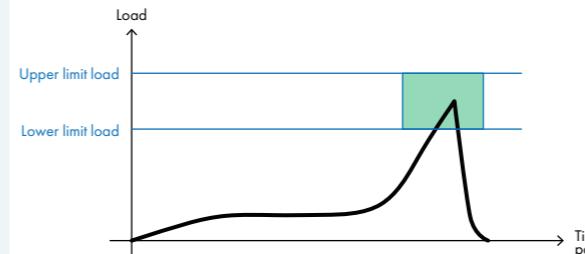

Load zone judgment

Upper & lower load limit monitoring in any position range (zone)

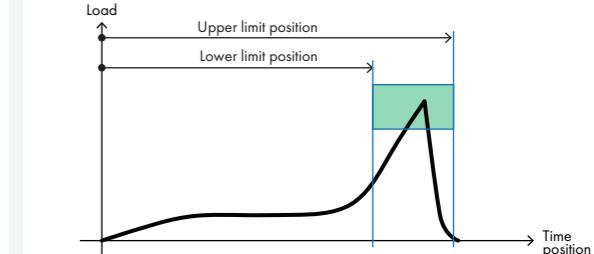

- Stops when a load outside the range is detected to prevent damage to the workpiece
- Selectable zone monitoring method from position / distance
- Up to 32 zones per program
- Can be set from the curve display screen
- Zones can be set for program operation regardless of step

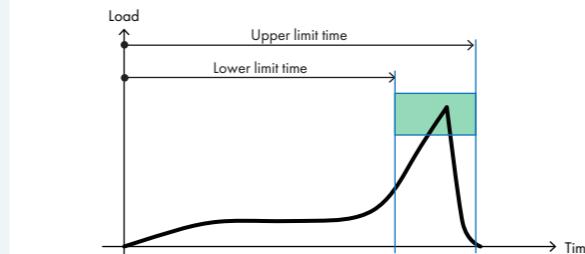

1 Final load judgment

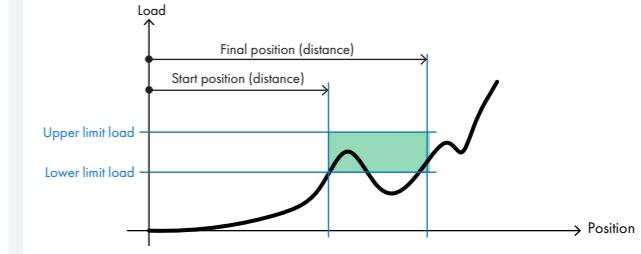

2 Final position judgment

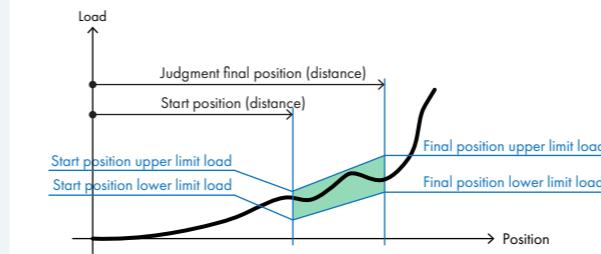

3 Execution time

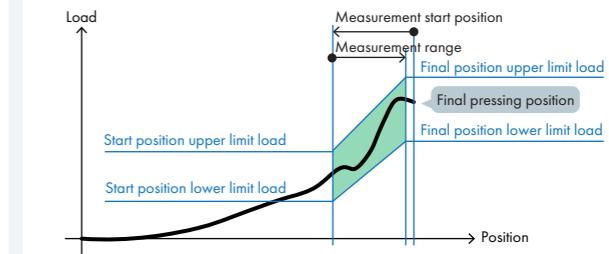

4 Peak load judgment

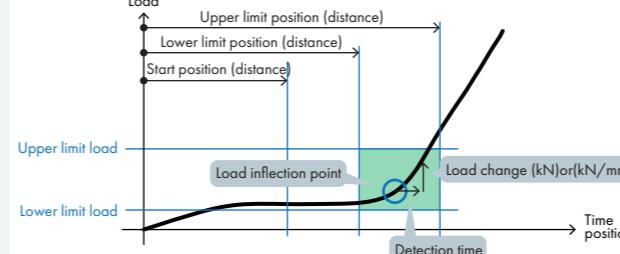

5 Section monitor judgment

6 Back monitor judgment

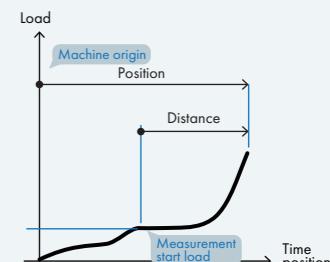

7 Inflection point monitor judgment

[Note]
Regarding position and distance

Position: distance measured from the machine origin
Distance: distance measured from the specified load as the start point

Press tool unit applicable range

Specification Table

Press control unit

General specifications

Model	A	B	C	D
Motor type				
Control power supply voltage				Single-phase AC200~230V AC 50/60 Hz
Main power supply				Three-phase AC200~230V AC 50/60 Hz
Control power capacity				50 VA
Main power capacity (during rated operation)	0.4 kVA	0.7 kVA	3.4 kVA	8.0 kVA
Inrush current value when control power is turned on	Approximately 26 Ao-p (convergence time: 5ms)			
Inrush current value when main power is turned on	About 6 Ao-p (convergence time: 400ms)			

Common specifications

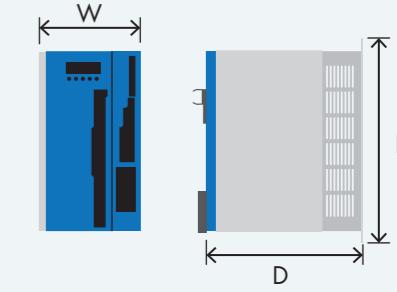

Display/Operation unit	5 characters x 1 digit 7-segment LED display, 5 function keys Indicator lamp (OK/ALM/NG)
Control input (PIN)	Photocoupler isolation (16 points) (24VDC, draw-in current 6mA/point) Both sink (-common) and source (+ common) connections can be made
Control output (POUT)	Photo MOS output: 16 points (24VDC, max. 50 mA/point) Both sink (-common) and source (+ common) connections can be made
Maximum number of pressing programs	255 programs x 127 steps Number of step execution programs: 1280 (maximum number of programs x 5 steps)
SS function	SS (safe stop) function (Motor power source is cut off without disconnecting power supply or motor cable.)
External communication port	RS-232C ETHERNET PC-USB Fieldbus
RS-232C	RS-232C x 1 port (switchable from 9600bps to 115.2kbps)
ETHERNET	Ethernet connection port x 2 port 10/100BASE-T
PC-USB	Port for management software connection USB connector (mini-B type)
Fieldbus	DeviceNet/PROFIBUS/CC-Link/EtherNet/IP/EtherCAT/CC-Link IE/PROFINET
Number of data memory items	Pressing result history: up to 100,000 Pressing curve history: up to 1,000 cases + 100 NG curves (varies depending on the sampling size setting) System error history: Up to 200
Other	Free assignment function (control input/output signal)
Load display resolution(kN)	20kN or less: 0.001/30kN or more: 0.01
Position display resolution(mm)	0.001
Repeat position accuracy(mm)	± 0.01 (under the same conditions)
Repeat load accuracy	3σ/̄x ≤ 1.5% (full scale)
Non-linearity	± 2% R.O

Model & options
